

**WE KNOW HOW TO
MAKE YOUR WORK
EASIER AND LESS
EXPENSIVE**

WE KNOW HOW TO MAKE YOUR WORK **EASIER** AND **LESS EXPENSIVE**

We are the specialists in the industrial water treatment, paint-stripping processes, pre-painting processes and treatment of metal surfaces.

Our laboratory is one of the most qualified in the field of research.

We produce every day and deliver immediately.

We know how to turn your problems into opportunities.

A GOOD TRAVELLING COMPANION

Every day more than a thousand companies in Italy and Europe entrust the quality of their production processes to Fiprokim's products and technology.

The continuous research of new solutions, the cooperation with important research institutions, the customized technical service and a team of people attentive to our customer's needs make Fiprokim a good travelling companion.

TREATMENTS FOR SERIES 300/400 STAINLESS STEELS

Liquid Solutions
Pastes
Gels
Sprays

FIPROSTEEL

A product line particularly suitable for removing blackening caused by welding and machining residues.

ANCILLARY PRODUCTS FOR WELDING FLUXING AND DEOXIDIZING AGENTS

Liquid Solutions
Pastes
Powders

FIPROFLUX

Products designed for the specific protection from blackening and the flowability of weld material during welding operations.

PRE-PAINTING TREATMENTS

**Liquid Solutions
Pastes
Powders**

Water-based detergents for the cleaning of metal surfaces and for pre-painting treatments.

Five different product lines designed for the removal of oil-based or interoperational contaminations and mild oxidations of sheet metals (iron, zinc, aluminium) subject to subsequent painting.

FIPROPHOS

METALFIP

FIPRO SG

ULTRAFIP

FIPROPLUS

TREATMENT OF PAINTING AND PURIFICATION WATER

**Liquid Solutions
Pastes
Powders**

Clarification of water for painting plants with water blasting.

Two groups of coagulants and flocculants to be used in chemical-physical or dynamic purification plants and for the water treatment in painting booths.

WATERFIP

ALCAFIP

GLUES

Adhesives and sealants with polyurethane, polymeric or cyanoacrilic formulation for all the high-performance and constant in time industrial bonding processes.

A complete range for the best technical and visual result.

FIPROPOWER

EASY

SIM

A BETTER

CERTIFIED PRODUCTS

The distinctive trait of FIPROKIM's philosophy is represented by the constant commitment to guaranteeing the maximum quality of product and process. A commitment that has rewarded the company with the certification UNI EN ISO 9001:2000 already obtained in 1998.

GUIDE

PLY PRODUCT

TS AND PROCESSES

All that guarantees FIPROKIM's capability of assuring the perfect correspondence of its products to the specific market demand and thus making the total customer satisfaction always possible.

ANCILLARY PRODUCTS FOR WELDING

FIPROFLUX

DESCALERS AND ANTI-SCALING AGENTS

FOR COOLING CIRCUITS, EVAPORATION TOWERS AND BOILERS

FIPRODISK

FIPROKIM

LUBRICANTS AND PROTECTIVE PRODUCTS

**Protective oils
Coolant lubricants
Cutting and metal
pressing oils**

A complete range of specific products for industrial processes and for metal cutting and pressing where lubrication, pieces protection and antirust action become important parameters for the good working result.

ELER CH

LUBROFIP

OILCAT

EMULOIL

BIKE GREASE

OILPROT

OILTAG

PAINT STRIPPERS

**Liquid Solutions
Gels**

Liquid or gel-based products, at room or hot temperature, designed for recovering parts which present painting defects and for the cleaning of painting equipment.

FIPROSTRIP

ANTI-SCALING AGENTS DESCALERS

Conditioning products for cooling circuits, evaporation towers and boilers. Specific products for the prevention and the removal of calcareous deposits in the water-based cooling circuits.

FIPRODISK

FIPRO AK

**INDUSTRIAL
INTERNAL
MAINTENANCE**
Liquid Solutions
Sprays

Liquid and spray ancillary products, designed for specific treatments, maintenance and detergency of machines for sheet metal processing and manufacturing machines, utensils, equipment, circuits and industrial floors.
